PAGES 1 ENCLOSURES (NO. & TYPE)

REMARKS

25X1X

1. Supply shipments passing through the Muellrose railroad station from the direction of Frankfurt/Oder toward Cottbus between 3 and 11 April 1953 included: a train of 20 flatcars with aircraft crates, each crate 8 meters long, on 3 April, which, on 4 April, were transloaded at the Cottbus freight yard on narrow-gauge railroad cars and shipped to Cottbus airfield; a train of 11 flatcars with aircraft crates, each crate 2 meters high and 8 meters long, on 8 April; and a train of 20 flatcars with aircraft crates, each crate 2 meters high and 8 meters long, on 11 April.¹
2. On 30 March, a shipment of five gondola cars with aircraft wings for bombers was observed at the Dobrilugk-Kirchhain railroad station. The train came from Munsterwalde and went to Klaus.²
3. Supply trains passing through the Stralsund railroad station toward Ruegen Island included: a train of an undetermined number of cars with 30 small-gauge locomotives on 26 March; and a train of 40 flatcars with 80 grabs for cranes on 30 March.³

25X1A 1. [REDACTED] Comment. At present, the VPL Division Cottbus is receiving YAK-11 training aircraft. It is believed that the shipments also were parts of this equipment.

25X1A 2. [REDACTED] Comment. Klaus is feeding station of Altenburg airfield. As, however, a fighter regiment is stationed at Altenburg, either the designation of the shipment or the receiving station are believed to be incorrect. The shipment probably went to Jueterbog.

25X1A 3. [REDACTED] Comment. The small-gauge locomotives and grabs will probably be used at the large Soviet construction project on Jasmunder Bodden.
